

HANDMADE CHARLOTTE

CONTEMPORARY KIDS DESIGN IN MILAN

BY DEBORAH

BEAU([HTTP://WWW.HANDMADECHARLOTTE.COM/AUTHOR/DEBORAH/](http://www.handmadecharlotte.com/author/deborah/))

Paola Noe from Unduestrestella has done it again! KidsRoomZoom has just closed the doors of its fourth edition at Fuorisalone in Milan, showcasing some of the finest, most original products in the children's design world today.

Set in a cool, chic apartment in central Milan, the theme of this year's exhibition was "My Superpower is...", giving Paola ample scope to prepare superhero snacks, organize artist-led superhero workshops and of course, curate a super collection of fun, cutting-edge design by up-and-coming and established international creatives.

Although I was unable to attend the show myself, I admire Paola's work immensely. She has a terrific eye for fresh talent and puts her heart and soul into promoting their new work. I hope you enjoy my small selection of favorites from KidsRoomZoom4!

Handmade Cardinal Bird Rug

Available from *Little Cabari*(<http://www.littlecabari.com/fr/7-tapis>)

The entire Little Cabari rug collection is stunning! A high-end brand specializing in luxury items for kids, Little Cabari offer wallpaper, bedding, furniture and toys. Their rugs are handmade in Portugal from 100% eucalyptus, and would certainly make a striking feature in any very lucky child’s room.

Zoo In My Hand Book

Available from *IK&SK Design*(http://www.ikskdesign.com/product/list.html?cate_no=24)

You may have already seen this very simple cut and fold zoo book which I love, but I hope you will take 5 minutes to browse these two talented Korean sisters’ other work (the cardboard castles, popup cities, craft stickers – all truly amazing). For play and display, this zoo book would make a lovely gift for a child or graphic design lover.

Space Wall Decal Set

Available from [Bumoon](#)

Who doesn't love a colorful space scene? Italian company Bumoon offer an original collection of wall stickers for kids but this uplifting, gender-neutral set is my favorite fun find. Look past the sun, moon and earth and you might spot an astronaut dog, a UFO and 3 little aliens – much better than counting sheep I say!

These few products really are the tip of the [kidsroomzoom4](#) iceberg! If you are interested in kids' design, and like to keep your finger on the pulse of the European kids' design industry, Unduestrestella is an excellent authoritative site to visit.

Pictured at the top of the post: Casita loft bed from [Kid's Modulor](#), a super bed for super heroes! Designed by Adrianna Correa, this convertible loft structure is made from FSC solid wood and plywood, and is suitable for children of 5 years and up. I love the fun house tent up top!
